

## Portfolio Description

The GYC VaR CPF series is a core portfolio strategy guided by our belief in Evidence-Based Investing. Its strategic asset allocation is structured to capture as much return as possible from globally diversified equity and fixed-income markets. There will be no regional nor sector tilts within the portfolio, which reduces the need for expensive tactical trading strategies.

The investment mandates within the portfolio are allocated to world-class investment managers who have been selected after a rigorous due diligence process. This portfolio is constructed with clearly defined risk and return attributes. The portfolio focuses on long term capital appreciation and does not pay dividends. An SRS version of this portfolio is also available.

VAR 12 has a loss metric of -12% (VaR) with a globally diversified asset allocation of **70% Stocks** and **30% Bonds**, comprising over 200 securities from around the world.
