

About the Strategy

GYC ZENITH is a long-only value equity strategy which blends quantitative valuation and technical trading techniques. The strategy invests in any country and only in large-caps (more than \$1bn). Invested companies are screened based on Value and Profitability - which have been scientifically proven to provide a higher expected return over the long run. Entry into, and exit from the market is based on trading indicators derived from analysis of securities momentum - which is also another scientifically proven market anomaly. The strategy will allocate into direct equities and Exchange Traded Funds listed across global exchanges.

Performance (in SGD)
